

Download the Overdrive App for Kindle Fire

Visit the OverDrive Website:

<http://overdrive.com/Software/omc/>

Once there, select "Android" and look towards the bottom of the page to see the following link.

- Click on the link and start downloading the app.
- You'll notice a small "1" in the upper-left corner of your Fire's touch screen right next to [your name's] Fire.
- Tap on that "1" to see the app's progress downloading.
- Once it has finished downloading and installing, open the app.

Notes:

- To read EPUB eBooks you'll need to register for a free Adobe ID (<http://adobe.com>) and authorize the OMC app with that email address and password. To find the Adobe registration area on the Fire, tap the small menu button at the bottom-center of the Fire's touch screen >> App Settings.
- You'll use the Fire's web browser to visit the Wisconsin Public Library Digital Download Center website (<http://dbooks.wplc.info>), log into your account, checkout an EPUB eBook or MP3 audiobook. Tap the "Download" button once the title is checked out and the app will take over.
- You cannot use WMA audiobooks with the Kindle Fire. The WMA audiobooks have DRM (security) developed by Microsoft. The DRM requires Windows Media Player to unlock the security. There is no WMP on the Fire.
- The EPUB eBook will expire in 7, 14 or 21 days. The title can be returned early from the app itself.
- The MP3 audiobooks expire in 7 or 14 days. The title will not be playable on the OMC app after the expiration date. Audiobooks **cannot** be returned early.

How to return the EPUB eBook early on the Fire's OverDrive Media Console:

- From the "Home" screen of the Fire's OMC app (the one where you see all of the titles listed...)
- Tap and press on the title until a new menu pops up.
- Tap "Delete."
- Tap "Return Then Delete."
- That's all. The title will be returned to the collection and your account freed up for another eBook.
